Office Action Summary	Application No. 10/069,360	Applicant(s) COSTA ET AL.	
	Examiner Alexander Kuo	Art Unit 2667	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 2/19/02.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 19 February 2002 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Huusko (US Patent #6,397,065).

- Consider claim 1, Huusko discloses a network comprising a location area connected by a radio access network (column 1, lines 43-45) to at least two core networks having different functionality (column 1, line 43), wherein the radio access network switches packet transmissions from each terminal in the location area to one of at least two core networks (column 1, lines 57-60) characterized in that the radio access network switches packet transmissions from each terminal to one of the at least two core networks in dependent on the terminal's capabilities (column 1, lines 57-63). It is inherent that a radio access network that can provide support to various core networks must be able to distinguish which core network the terminal is to connect to based on terminal capabilities, such as the various 2G communication systems Huusko discloses (column 1, lines 53-57).

- Regarding claim 2, it is inherent that terminals with different capabilities are also different terminal types, and so the radio access network switches packet

Art Unit: 2667

transmissions from each terminal to one of the at least two core networks in dependence on the terminal type.

- Regarding claim 3, Huusko teaches a location updating method (column 3, line 24-28) in which the radio access network switches packet transmissions from each terminal to one of the at least two core networks in dependence on the identity of the cell in which the terminal is connected.

- Regarding claim 4, the above analysis of Huusko reference with respect to claim 1 is also equally applied to this method claim.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pehrson has a management system and method of using different base station types. Rune discloses a Universal Radio Access Network (URAN) that provides a generic interface that any type of service can connect to. Rinne teaches a method and system for connecting different standards (UMTS/GSM) to a GSM core network.

It is also noted that two of the references that the applicant discloses: Schieder and Berruto, have similar networks, so termed GRAN or URAN, where terminals can connect to either 2G or 3G networks. The ability to connect to various core networks based on what a terminal can support is inherently dependent on terminal capabilities, and thus also type.
